03 / COLLECTION REGISTRY

Sun Drop Master Registry

Collection hierarchy, recorded nine-work sequence and supplemental field-study catalog.

PUBLIC / CREATOR-AUTHORED 15 NOVEMBER 2026 • V1.0

Registry distinction

Creator-designated collection membership and draft study numbers are not independent certificates. Existing Sun Drop numbers #106–#114 must not be silently renumbered or displaced by newer studies.

Core Sun Drop Collection — prior locked nine-work sequence

Record	Creator-designated title	Current handling
#106	9 Crowns of the Sun	Prior locked title; match to exact approved display file before republication
#107	Vibration of Energy	Prior locked title; match to exact approved display file before republication
#108	Brightness Warm	Prior locked title; match to exact approved display file before republication
#109	Crown of Fire	Prior locked title; match to exact approved display file before republication
#110	Sun Men	Prior locked title; match to exact approved display file before republication
#111	Night Council Around the Sun	Prior locked title; match to exact approved display file before republication
#112	Eclipse of Shadows Regret	Prior locked title; match to exact approved display file before republication
#113	Redeemer of Sun’s Collection	Prior locked title; match to exact approved display file before republication
#114	Celebration Around the Sun	Prior locked title; match to exact approved display file before republication

Supplemental studies — separate numbering family

Study ID	Title / working label	Evidence / review
SD-BHS-001	Sun Drop – Bliss Hidden Structure Field	Creator discussion title; exact pink/yellow source and output not yet matched; D1 pending
SD-HDS-001	Sun Drop – Hidden Drift Study (Field Variant)	Earlier chat calls locked; re-check asset identity and transformation lineage
SD-SCL-001	Sun Cross Light	AI-generated examples seen in chat; MGOART unless source-bound original is proven
SD-SSS-002	Swords of Sun	AI-generated examples seen in chat; MGOART unless source-bound original is proven

Public-facing collection interpretation

The Sun Drop Collection surveys luminosity, orbital forms, surface grain, halos, visual rhythm and emerging pattern relationships. Its creator-designed TAHPF coordinates provide a vocabulary for comparing how each image is perceived and transformed. An internal study identifier is an archive control, not an independent discovery certificate.

Catalog checklist by artifact

- Record exact artist-approved title, creation date (if established), Core/Base/Main/evidence roles, edition and rights status.
- Record which coordinate stack was requested, which operation was actually applied, and what software/version produced the image.
- Separate approved public plate from original camera files and restricted research files; use a public-safe caption.
- Publish only source-level visual observations as fact; keep origin beings, life forms and emotional mappings explicitly interpretive.
- Cross-index study numbers to #106–#114 without changing previously locked numbering.
